

Cascade County COVID-19 Vaccine Eligibility

November 8, 2021

	Pfizer-BioNTech	Moderna	Janssen/Johnson & Johnson
Eligibility for primary dose series	Age 5 and older receive a 2-dose primary series, separated by at least 21 days .	Age 18 and older receive a 2-dose primary series, separated by at least 28 days .	Age 18 and older receive 1 primary dose.
Eligibility for 3rd primary dose for the immune compromised	If the first 2 doses were Pfizer, then a 3 rd dose may be given, not less than 28 days after the 2 nd dose, to persons age 12 and older with compromised immune systems . If you are not sure whether you qualify as immune-compromised, please discuss with your physician. <i>This is a 3rd dose of the primary vaccine series, not a booster; persons eligible for this 3rd primary dose may still receive a booster (4 doses in total) when eligible. Mixing-and-matching a different vaccine is not authorized for this 3rd primary dose.</i>	If the first 2 doses were Moderna, then a 3 rd dose may be given, not less than 28 days after the 2 nd dose, to persons age 18 and older with compromised immune systems . If you are not sure whether you qualify as immune-compromised, please discuss with your physician. <i>This is a 3rd dose of the primary vaccine series, not a booster; persons eligible for this 3rd primary dose may still receive a booster (4 doses in total) when eligible. Mixing-and-matching a different vaccine is not authorized for this 3rd primary dose.</i>	Not applicable
Eligibility for a booster dose	If your first 2 (or 3) primary doses were Pfizer or Moderna, then a booster dose may be given, not less than 6 months after the last primary dose, to the following people: <ul style="list-style-type: none"> • 65 years and older • 18+ and living in a long-term care setting • 18+ with underlying health conditions • 18+ who live or work in high-risk settings You may mix-and-match this booster dose – your booster may be Pfizer, Moderna, or Janssen. However, the Pfizer eligibility requirements (including the 6-month wait time) apply regardless of whether you will receive a booster dose of Pfizer, Moderna, or Janssen.		If your first dose was Janssen, then a booster dose may be given, not less than 2 months after the second dose, to people age 18 and older . These Janssen eligibility requirements (including the 2-month wait time) apply regardless of whether you will receive a booster dose of Pfizer, Moderna, or Janssen.
Dose volume and formulation	A booster or 3 rd dose of Pfizer is a full dose , for all eligible persons. This applies regardless of which vaccine you received for your primary dose(s). Pfizer immunizations for age 5-11 are different in formulation, dose volume, and dilution from the immunizations for age 12+. Healthcare providers should carefully review the most recent Emergency Use Authorization and Provider Fact Sheet to ensure they are providing the correct formulation and dose.	A 3 rd primary dose of Moderna for the immune compromised is a full dose . A booster dose of Moderna for the other eligibility categories is a half dose . This applies regardless of which vaccine you received for your primary dose(s).	A booster dose of Janssen is a full dose , for all eligible persons. This applies regardless of which vaccine you received for your primary dose(s).
